## Casa Grande Regional Medical Center

1800 E. Florence Blvd.  
Casa Grande  
520-381-6300

Casa Grande Regional Medical Center (CGRMC) is a full-service, community-owned, nonprofit hospital committed to providing quality health care to the Casa Grande area in a caring and compassionate environment.

CGRMC completed a \$25 million expansion to its facility to meet the growing needs of the rapidly developing areas of Casa Grande and its surrounding communities. CGRMC doubled its Intensive Care Unit to accommodate 22 patients. A new patient tower was also built adding 56 patient rooms, which brought the capacity for providing patient care to 201 private patient rooms. A full range of medical and surgical specialties are represented at this hospital including family care, internal medicine, oncology and orthopedics.

CGRMC also features Desert Reflections Imaging Center, "Reflecting Your True Image," which provides Computerized Radiography (Digital X-Ray), Digital Fluoroscopy, Ultrasound, Multi-Slice CT Scanning, and High Definition, High Field MRI. The dedicated women's center area consists of Low-Dose Mammography and Bone Density exam rooms. The Center is designed to give women a more comfortable, personable and private atmosphere.

### Accreditation

Casa Grande Regional Medical Center is accredited by the Joint Commission on Accreditation of Healthcare Organizations, JCAHO. That means that we voluntarily submit to evaluations of our compliance with nationwide hospital standards on a continuing basis. Joint Commission accreditation is your assurance that Casa Grande Regional Medical Center practices continuous quality monitoring to provide you with quality health care.

## Arizona Heart Institute

803 N. Salk Drive, Casa Grande  
520-836-6682

The Arizona Heart Institute (AHI) Casa Grande Office provides full-time cardiovascular services in a geographic location convenient to Robson Ranch homeowners. State-of-the-art diagnostic and therapeutic procedures are available in both the outpatient and inpatient setting.

### Prevention

Prevention services include: Executive Physical, Lipid Clinic, Rehabilitation, Smoking Cessation Program, Stress Reduction & Support Services, and Vitamins & Supplements program.

### Diagnosis

AHI offers a cardiovascular 64 slice CT scan for calcium testing which assists doctors in assessing a patient's risk of developing coronary artery disease. Services at Arizona Heart Institute include Cardiothoracic Surgery, Interventional Cardiology, Thoracic (Chest) Procedures, Vascular Surgery and Vein Clinic. The Vein Center at AHI uses the latest treatment techniques available including Endoluminal Laser Ablation of the Greater Saphenous Vein (ELT) and Endovenous Radiofrequency Closure to treat varicose and spider veins.

### Rehabilitation

Getting Back on Track: AHI offers a program designed to help those with heart disease realize faster and fuller recoveries under the watchful eyes of a fully trained staff. It's called Cardiovascular Conditioning & Preventive Medicine Program, and it's designed to help restore lost vigor and maintain a healthy, productive lifestyle through monitored exercise and risk factor modifications.

## Cancer Treatment Services Arizona

1876 East Sabin Drive, Suite 10, Casa Grande  
520-836-9800

The state-of-the-art full-service outpatient cancer treatment center in Casa Grande allows its physicians to provide university-level care in a community setting. Cancer Treatment Services Arizona physicians and clinical staff have access to cutting-edge protocols that integrate medical and radiation oncology services.

### Radiation Therapy Services

Radiation therapy uses ionizing radiation to destroy cancer cells and shrink tumors. Cancer Treatment Services Arizona provides highly conformal therapy that targets the tumor and spares healthy tissue by using the most advanced technology available in the market. Treatment modalities offered include:

- 3D Conformal Therapy
- Intensity Modulated Radiation Therapy (IMRT)
- Image Guided Radiation Therapy (IGRT)
- Stereotactic Radiosurgery
- Brachytherapy

The radiation oncologists rely on centralized radiation treatment planning and standardized treatment protocols to ensure that all of the patients, regardless of where they are treated, receive the same high-quality radiation therapy that they would receive at the top cancer centers around the world.

### Medical Oncology Services

Cancer Treatment Services Arizona provides professional oncology and hematology services as well as infusion for the delivery of chemotherapy, biologic therapy and supportive care for regimens of all levels of complexity. Patients are treated using clinical pathways, or evidence-based treatment "roadmaps" that are disease and stage specific. The medical oncology cases are reviewed by a centralized subspecialty board allowing for standardization of treatment, quality assurance and outcomes tracking.

### Other Services

In addition to radiation and medical oncology services, Cancer Treatment Services Arizona provides a variety of other services.

- Clinical Research
- Radiology
- Outpatient Services
- Education and Outreach
- Laboratory Services
- Surgical Oncology
- Cancer Screening
